FTPS

1 INTRODUCTION

FTPS is the way which is being used by Parentix for a secured data transfer when starting as a new customer at Parentix or when requesting a back-up.

In this document you will find more/detailed information how to log on and connect to FTPS to download or upload files

1.1 INSTALLING WINSCP

To achieve access to FTPS there is some software which is required to be installed and used. The software is WinSCP. This is a free tool which can be downloaded from:

<https://winscp.net/eng/download.php>

DOWNLOAD WINSCP 5.21.1 (11 MB)

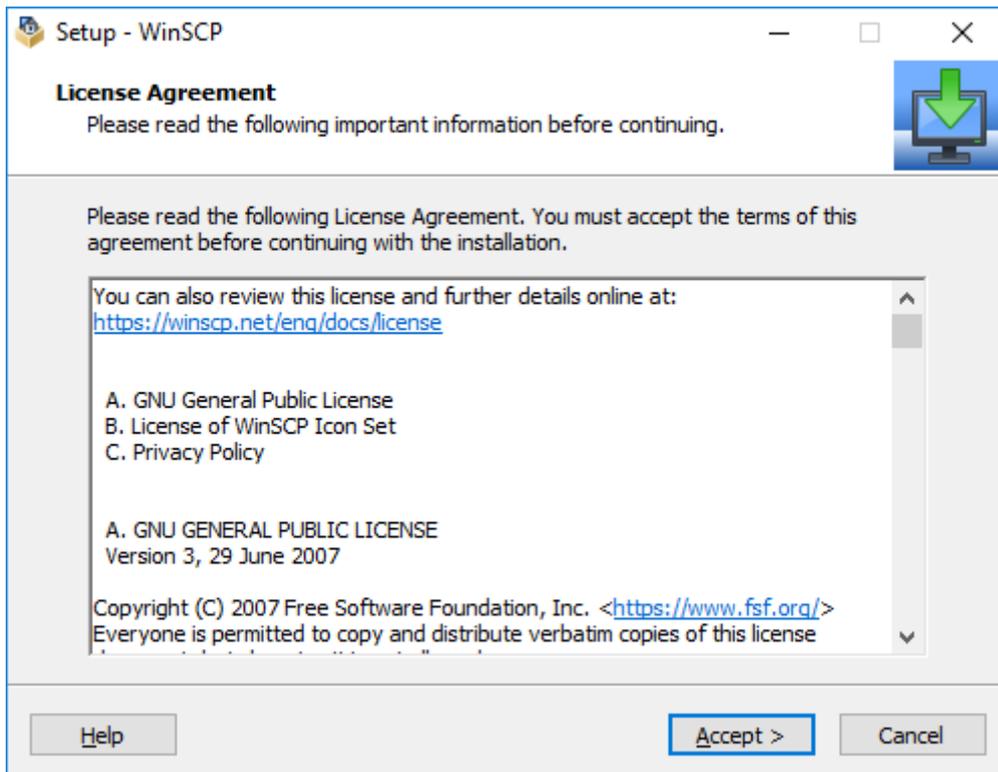

1,078,451 downloads since 2022-06-24

FTPS

1.1.1 THE INSTALLATION OF WINSCP

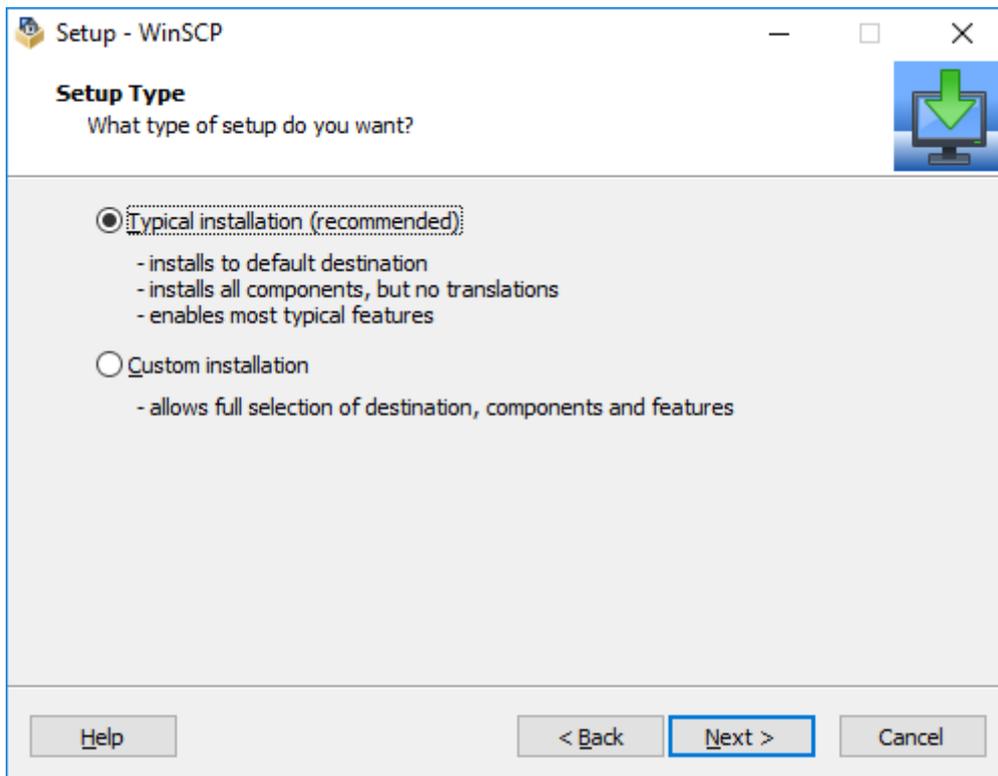

When the installation file has been downloaded you can start it up. You need to follow through the next few steps.

You can click on Accept in the following screen:

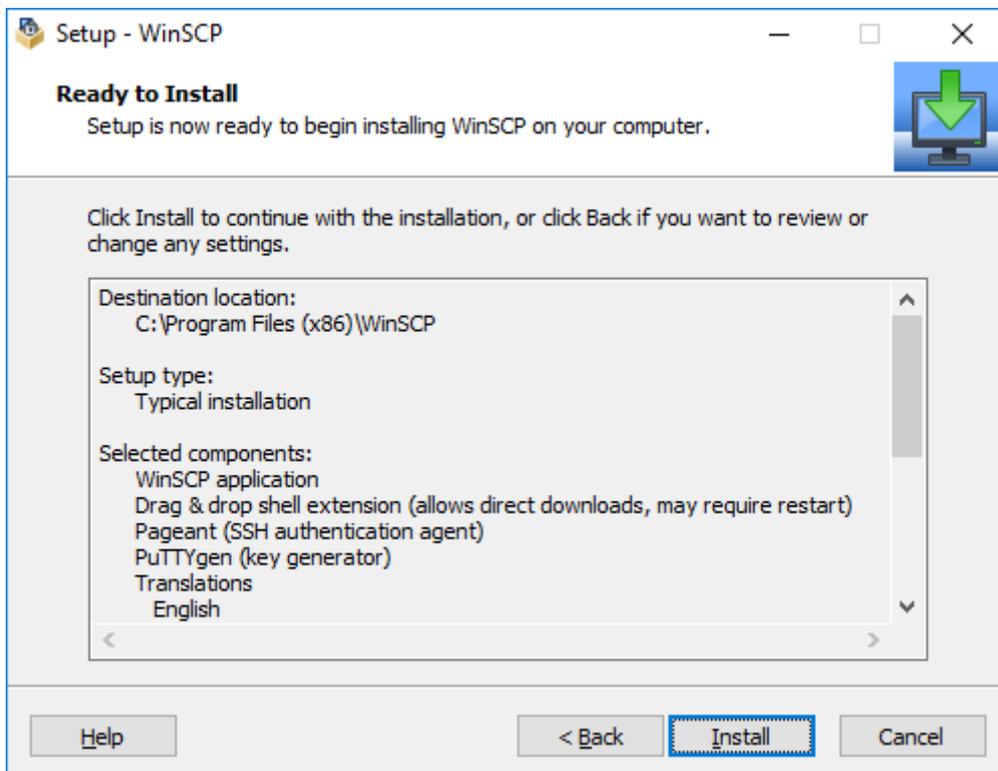

You can choose the option "Typical installation (recommended)" and click on Next as shown below:

FTPS

Click on Install in the following screen:

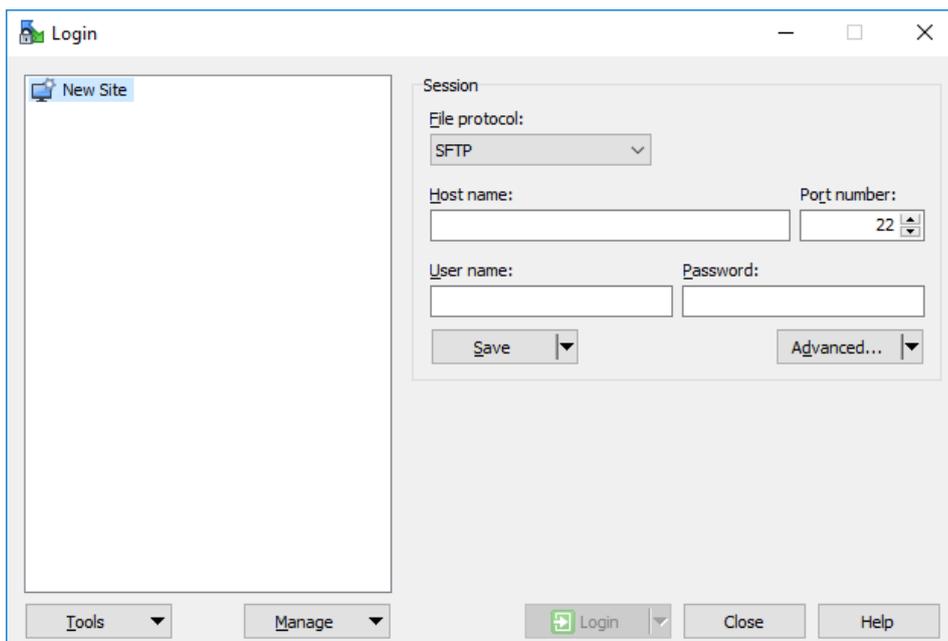

FTPS

As shown below you can deselect the lower checkbox and click on Finish:

1.1.2 CONFIGURING AN FTPS ACCOUNT

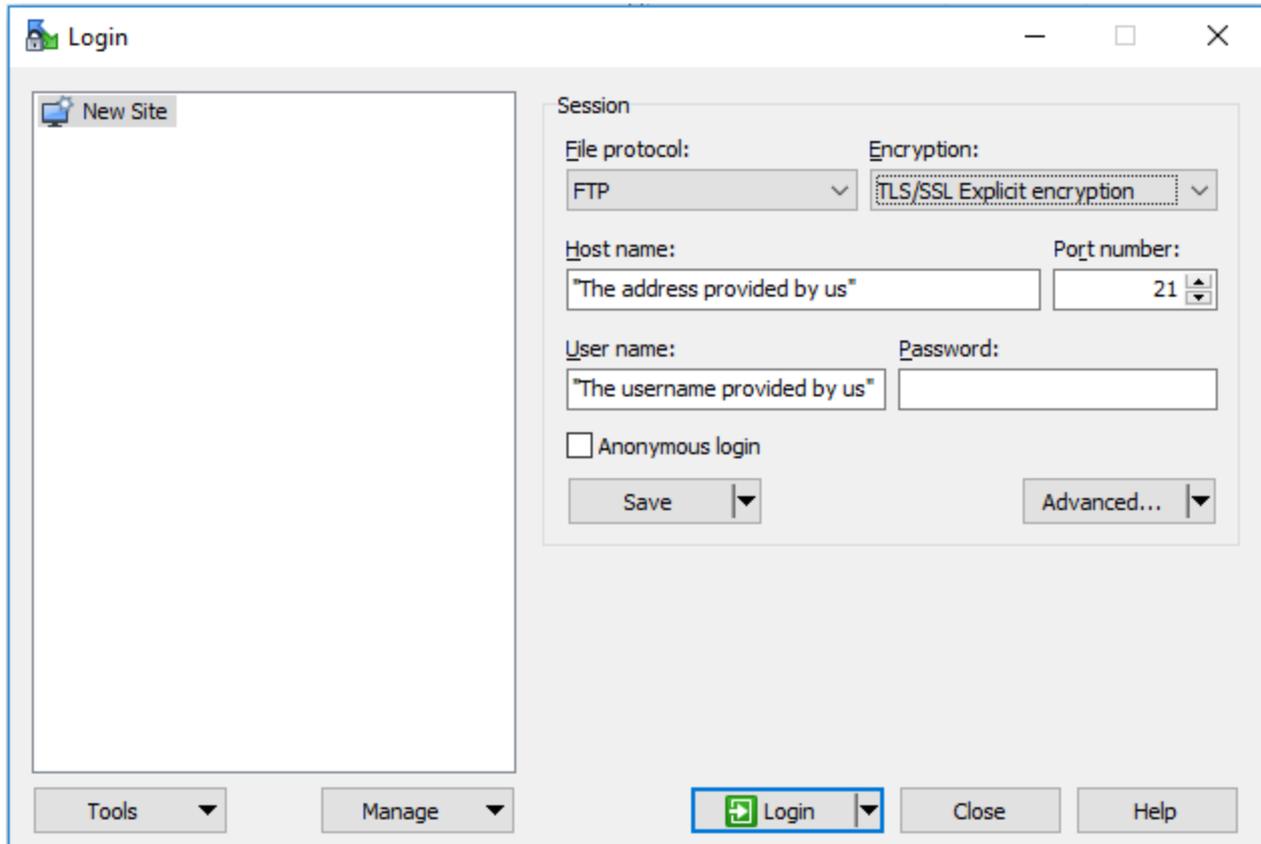

When the program has started, you can start to configure the required setup. Once the program is open on your screen you will see the following window:

FTPS

Please fill in all the fields as shown in the screenshot displayed below:

- In the field Hostname you can fill in the address as provided by Parentix.
- In the field Username you can fill in the username as provided by Parentix.
- In the field Password you can fill in the password as provided by Parentix.

Then you click on “Login”

2 DOWNLOADING/UPLOADING DOCUMENTS

When you are logged in you can download or upload documents as required.
